SUMMARY

Software Engineer with 2.5+ years of experience building scalable cloud-native applications and secure multi-tenant systems using React.js, FastAPI, MongoDB, and Firestore. Experienced in GCP deployments, observability, and cloud infrastructure, with hands-on knowledge of AWS services and a growing focus on Docker, Kubernetes, and Platform Engineering.

EXPERIENCE

Software Engineer

Neural Labs Pvt Ltd

Feb 2024 – Present

Hyderabad, India

- Built and maintained secure multi-tenant cloud-native applications using React.js, FastAPI, Firestore and MongoDB.
- Deployed and managed production workloads on Google Cloud Platform using Compute Engine, GCS, Memorystore, Nginx, Gunicorn, Uvicorn and SSL/TLS.
- Improved authentication performance by ~40% using Redis (GCP Memorystore) for token caching and session acceleration.
- Implemented observability using OpenTelemetry and Grafana, reducing debugging and incident resolution time by ~60%.
- Designed scalable database architectures across Firestore, MongoDB and SQL environments.
- Collaborated on cloud automation workflows and API integrations using OpenAI and Claude APIs.

Data Analyst Intern

DataBeat

May 2025 – Aug 2025

Hyderabad, India

- Designed and optimized SQL and BigQuery workloads for large-scale datasets.
- Developed Looker Studio dashboards for operational and business reporting.
- Automated recurring reporting workflows using Python and Google Apps Script.
- Received a full-time offer based on strong performance.

SKILLS

- Programming:** Python, JavaScript, SQL
- Cloud Platforms:** AWS, Google Cloud Platform
- AWS Services:** EC2, S3, IAM, VPC, Route 53, Security Groups, RDS, AWS Lambda, SNS, EventBridge, ACM, Boto3
- Google Cloud:** Compute Engine, Cloud Storage (GCS), Memorystore
- Infrastructure & DevOps:** Linux, Docker, Nginx, Supervisor, Certbot, SSL/TLS
- Observability:** OpenTelemetry, Grafana, Distributed Tracing
- Databases:** MongoDB, Firestore, MySQL, Redis
- Backend Technologies:** FastAPI, Flask, REST APIs
- Core Expertise:** Cloud Deployments, Multi-Tenant Architecture, RBAC, API Development, Infrastructure Monitoring

PROJECTS

Cloud-Based Scalable E-Commerce Platform

Jun 2023 – Aug 2023

- Built using React.js (MUI) and FastAPI with hybrid MySQL + MongoDB storage.

Real-Time Collaborative Code Editor

Jan 2024 – Feb 2024

- Built using React.js, WebSockets, FastAPI, Redis, and MongoDB with indexing optimization.

EDUCATION

Bachelor of Engineering in IT

Osmania University

2020 – 2024

CGPA: 8.88

Intermediate

TSBIE

2018 – 2020

97.8%

LANGUAGES

English
Hindi
Telugu
